**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 9-21, 30-39, 41-50 and 74, drawn to a diagnostic device, classified in class 600, subclass 476.
- II. Claims 7-8, drawn to a chamber, classified in class 396, subclass 39.
- III. Claims 22-23, drawn to a panel, classified in class 211, subclass 75.
- IV. Claims 24-29, drawn to illumination means, classified in class 362, subclass 3.
- V. Claim 40, drawn to detection means, classified in class 600, 431.
- VI. Claims 51-54, drawn to a viewer, classified in class 600, subclass 103
- VII. Claim 55, drawn to a diagnostically capable device, classified in class 600, subclass 477.
  
- VIII. Claims 75-76, drawn to a 3D imaging device, classified in class 600, subclass 407.
- IX. Claims 77-80, drawn to 2D imaging device, classified in class 600, subclass 407.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Groups II-IX are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the

Art Unit: 3742

combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombinations as claimed because each subcombination recites limiting features not found in the combination. The subcombinations have separate utility such as chambers, panels, illuminators, detectors, viewers, diagnostics and imagers.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species:

Species A 3D imaging

Species B 2D imaging

The species are independent or distinct because independent.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 3742

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel L. Robinson whose telephone number is 571-272-4788. The examiner can normally be reached on m-f 5:30-2:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robin Evans can be reached on 571-272-4777. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
